

FASTAID LIFEPAK CR2 ESSENTIAL SEMI-AUTOMATIC PUBLIC ACCESS DEFIBRILLATOR

Description

- 8 year warranty
- Semi-automatic
- Two set languages to choose from
- Adult and child modes to choose from
- IP55 rating for challenging environments

The FastAid Lifepak CR2 Essential is a semi-automatic AED that is designed to make the rescue process easier and ultimately save lives. With its audible instructions, clear graphics, and automated features, rescuers can remain focused on their task. The device also includes an inbuilt CPR Coaching system that gives users the confidence to perform CPR accurately, along with a metronome to ensure the correct compression rate is maintained.

The Lifepak CR2 Defibrillator is suitable for adults and children (with a Child Mode Button) and includes a Language Button for switching between primary and secondary languages. Its IP Rating 55 (dust and water protected) and lightweight design (2.0kg) make it portable and durable for use in any environment.

Features a layered design with easy-to-follow bold graphics. Both trained and untrained AED users clearly know how to begin. QUIK-STEP™ electrodes mean you peel directly off the base for faster placement.

Metronome and CPR coaching sets an effective pace and audibly guides users with ClearVoice™ technology detecting background noise and adjusts volume accordingly for clear instruction. Continuous CPR improves blood circulation and increases chances of survival. The LIFEPAK CR2 is the only AED currently available that allows chest compressions during electrocardiogram (ECG) rhythm analysis, reducing pauses between CPR and defibrillation.

Highest available escalating energy provides up to 360J for more effective shocks as needed, with child mode delivering lower energy levels appropriate for young children without having to change electrodes. Also has a bilingual toggle to switch between two pre-set languages when using the device.

Featuring an IP55 rating against dust and water, the Lifepak CR2 works in challenging conditions.

The Lifepak CR2 Defibrillator is designed for user confidence. Simple graphics, audible instructions and automated features help users remain focused during a sudden cardiac arrest emergency. Dual language capabilities and ClearVoice™ technology help users understand and hear voice prompts.
